The opening of the activities of the project “Integrating Sustainable Development Goals into Universities for Better Management of Climate Change,” which is funded by the European Union within the Erasmus Plus program (2021-2024) with a budget of 15 million pounds, via the electronic platform, and its work continued over two days. Alexandria University is leading the project, which includes 7 other partners, from the European Union, namely the University of Aveiro in Portugal, the University of Sassari in Italy, the University of Valencia in Spain, the Euro-Mediterranean University from Slovenia, and from Egypt the Arab Academy for Science, Technology and Maritime Transport, Zewail University, and Heliopolis University. The project aims to enhance the capabilities of Egyptian universities in terms of raising awareness of sustainable development goals for university members, integrating sustainable development goals into strategic plans and university policies, and transforming universities into environmentally sustainable universities.

The First International Symposium on Sustainable Water Solutions in Alexandria, organized by the Center for Water Excellence at Alexandria University (funded by the United States Agency for International Development in Cairo, USAID, and in partnership with a coalition of Egyptian and American universities with the aim of supporting learning and research in the field of water).

Water-Energy-Food Nexus and its connectivity to SDGs
Tuesday, March 14, 2023 at 9PM Cairo Local Time (CET)

THIS WEBINAR WILL FOCUS ON:

- Development of an integrated water - Energy - Food (WEF) nexus system
- Development Sector - agriculture greenhouse system that grows its own energy and trapping water
- How to find proper solution for food and water stress in arid areas
- Importance of WEF Nexus
- Natural Elements Integration and tools
- WEF and its impact on SDGs

Speakers

Prof. Sherif Elshorbagy
Sherif Elshorbagy, PhD, is a Professor of Environmental Studies at the University of California, Santa Cruz. He is the founding director of Center for Integrated Water Management.

Prof. Abdulaziz Najm
A Professor of Mechanical and Water Resources at Zagazig University and is also associated in mechanical and sustainability issues.

Prof. Marwan Fathy
A lead expert on WEF-SDG regional aspect in Egypt and also Energy Efficiency (EE) including Water Energy and Government (WEEG) expertise.

In the frame of the webinar series, the Center of Excellence for Water organized the twenty first webinar with California Santa Cruz University and Zagazig, entitled: "Water Energy Food Nexus and its connectivity to SDGs"

Distinguished participation of Alexandria University in COP27 Activities. Within the activities of the COP27 Summit for Climate Change, the Alexandria University exhibition in the Green Innovation Pavilion in Sharm El-Sheikh, witnessed the influx of a number of dignitaries, led by ministers, officials, presidents of Egyptian universities, foreign delegations participating in the conference, in addition to students from Arab and foreign countries, to learn about the contributions of Alexandria University in climate issues and how to confront the negative effects of climate change.

Seminar on "Management, Sustainability and Strategic Planning of the Center of Excellence for Water" at Faculty of Engineering. The project of the Water Excellence Center at Alexandria University is working to find solutions to the expected water problems in light of population growth and the serious challenges we are currently facing in Egypt.

Discussing ways of cooperation between Alexandria University and the Vice President of the Climate Group at the University of Cambridge in Britain and the official for international cooperation in the COP26 university network on the issue of climate change and ways to enhance academic and research relations and aspects of joint cooperation in preparation for the COP27 conference. The attendees gave a presentation on Alexandria University's projects in the field of environmental sustainability in preparation for the COP27 climate conference, and included projects on the production of green and grey hydrogen, the design and manufacture of electric vehicles, the establishment of the Alexandria University Company for Energy and Water Services, and the establishment of an electronic components manufacturing center, in addition to preparing studies on diversifying energy sources. Egypt's role as a regional energy center and the contributions of the Suez Canal to reducing carbon emissions at the international level.

The Center for Educational Innovations and Distance Learning organizes, on the 24th and 25th of October 2022, its fourth international conference APITEL 2022 in a special version to launch the Pilot business incubator, under the title "New Technologies and Trends in Higher Education: Sustainability and Entrepreneurship."

Alexandria University held a symposium on “Climate Change and Green Transformation: The Vision of Alexandria University with several universities and scientific bodies to participate in the COP27 climate conference. These projects include the use of green hydrogen and green ammonia in the fertilizer industry in cooperation with the Egyptian Chemical Industries Company (Kima), the establishment of the Alexandria University Company for Energy and Water Services, the localization of the electric car industry inside Egypt through the design and manufacture of the electric bus and the electric car, the role of the Suez Canal in reducing carbon emissions on the global level, the establishment of the Alexandria University Centre for the blue-green economy, the role of Egypt as a regional centre for Energy, the production of green and grey hydrogen, the establishment of the Electronic Components Manufacturing Centre, in addition to the establishment of the Alexandria University Centre for Sustainable Development, with the aim of achieving sustainable development goals within the Alexandria University campus in order to turn it into a green university.

The first activity of the Greener Blue Economy Center at Alexandria University, a workshop held under the title "Sustainable Blue Economy Issues in the Mediterranean Basin Countries", in the Conference Hall at the Faculty of Commerce, generating electricity from water energy, mining activities in the seas and oceans, marine tourism, fishing activities, extracting raw materials from the sea, and other forms of economic activity mainly related water resources.

Faculty of Pharmacy, in cooperation with the students of the Scientific Society of Faculty of Pharmacy, organized a sports marathon for walking and cycling under the title "Running for Green" within the framework of the preparations of Faculty of Pharmacy and University of Alexandria for the Climate Change Conference COP27 which was held in Sharm el-Sheikh in November 2022.

The opening of the international conference organized by the Faculty of Agriculture, Alexandria University, under the title "Sustainable Management of Smart Animal Production Farms." Its activities continued over two days, during which a group of scientists and specialists discussed ways to reach a common vision and solutions for the development of livestock, poultry and fisheries in Egypt and draw a clear, integrated vision, to confront the challenges that hinder the advancement of livestock in Egypt.

A cooperation agreement between Alexandria University and the Egyptian Chamber of Commerce in Alexandria to establish a solar energy station at the Faculty of Engineering. Under this agreement, the Faculty of Engineering - Alexandria University operates the station with solar energy within the framework of the MAIA-TAQA and SOLE projects funded by the European Union, within the framework of the Mediterranean Basin Cross-Border Cooperation Program EU ENI CBC Med.

It is worth noting that the “SOL” project, funded by the European Union, supports the energy rehabilitation of public buildings in an effective and economical manner, and ensures the consumption of clean, low-cost energy.

Faculty of Science’s tenth celebration of World Earth Day, which was held at the college building in Shatby, under the title “Extreme climate phenomena and the challenges of sustainable development.” On the sidelines of the celebration, a special exhibition was held for the college’s departments and programs and units of a special nature, as well as exhibitions for participating companies, school exhibitions, and the Children’s University.

Alexandria University hosted the third meeting of the Steering Committee of the Comprehensive and Sustainable Development of the Tomato Value Chain Project, as the host of the Tomato Value Chain Educational Service Center (TLSC).

Alexandria University participated in the Egyptian Public Universities Activities and Events Forum to Confront Climate Change 2022, during the period (September 22-23, 2022).

The preparatory webinar for the COP28 Climate Conference, which was organized by the International Committee for the Development of Dry Lands, the Regional Action for Climate Change Foundation in Japan, the “Nizami Ganjavi” International Centre, and the African Organization for Young Leaders, at the Conference Centre of the Faculty of Medicine. The webinar discussed many important topics, including climate change and dry lands, food security, biodiversity, energy and sustainable development, political will and human solidarity needed for change, adaptation, African youth's view of climate change, the Egyptian perspective on climate change, and funding requirements.

The Faculty of Education hosted the educational symposium on “Community Awareness of the Climate Change Issue, and its Health, Environmental and Economic Impacts”

Cooperation protocol between Alexandria University Engineering Centre and the Holding Company for Water and Wastewater, providing consulting services for Rainwater Management Integrated Strategy Project in Alexandria.

A cycling race and marathon events were launched as part of the Scientific Conference on Climate Change and Sports, organized by the Faculty of Science and the Faculty of Physical Education in Abu Qir from 27-29 October 2022.

The Higher Institute of Public Health organized a celebration on the occasion of World Environment Day under the title (Our Land...Our Future). During the celebration, a number of lectures was discussed, such as clean technology, industrial pollutants and methods of disposal, climate literacy, disease vectors, analysis methods for environmental pollutants, and the activities of the Institute's units such as (the Occupational Health and Air Pollution Research and Studies Unit, the Environmental Health Research and Studies Unit, and the Central Laboratory Unit). As well as how to develop clean energy alternatives, such as "preparing for green, green cities, developing smart environmental food and agricultural systems such as phytoremediation, and the role of the individual and society in improving air quality."

The educational seminar organized by the university, in cooperation with the Youth Coordination of Political Parties and Politicians, under the title "Climate Action Path from Stockholm to Sharm el-Sheikh" and a panel discussion on the national dialogue. The meeting witnessed various discussions among the attendees that dealt with the economic, social and cultural challenges facing the country, which included issues of health, education, infrastructure, environment, psychological support, high prices, ethical and behavioral phenomena and how to confront them and provide unconventional solutions in light of the available resources.

رؤية ورئاسة قسم الكيمياء

الرؤية: يتطلع قسم الكيمياء أن يكون مركزاً متديداً لعلمياً ويعمل على تحسين التعليم الإقليمي والدولي في مختلف فروع الكيمياء ومجالات الكيمياء التطبيقية (ارتباطاً وبمناهج الصناعة والبيئة لخدمة المجتمع

الرسالة: إمداد خريجون ذوي خبرة واسعة ومؤهلات علمية في مجال الكيمياء لتلبية احتياجات سوق العمل. هذا إلى جانب تنمية قدرات الخريجون على إجراء البحوث الأكاديمية والتطبيقية لدعم التنمية الوطنية وبرامج إعادة ممتلكة استخدام التكنولوجيا الحديثة وتكنولوجيا المعلومات في تنمية البهارات لدى الطلاب والمكاديميين. مهارات جديدة وتنمية قدرتهم على التعلم والعمل الذاتي المستمر. ربط القسم بالهيئات الأكاديمية والشركات الصناعية للحصول على مشروعات تطبيقية ممولّة من جهات محلية وأجنبية. يقدم القسم العديد من النقاط البحثية التي تساهم بأقلية في خدمة المجتمع

التعاون بين القسم والصناعة

الدعم المالي والشبكات العلمية والبحثية للباحثين والمؤسسات الصناعية للمساعدة في تنمية الجنود العلمية العديد من المشكلات العلمية والصناعية والبيئية والبحثية

- يتم إلقاء أربعة برامج ماجستير مهنية
- للماستر في الفيزياء والكيمياء التحليلية
- للماستر في الكيمياء الحديثة التطبيقية
- للماستر في كيمياء الصناعات غير العضوية والإنتاجية
- للماستر في كيمياء المواد للهندسة في المجالات علم الحسائل العلمية
- التدريب على الصناعة للمشاركة في تدريب الخريبات الملتحقين بالقسم
- مؤتمرات علمية في الشركات
- مؤتمرات تعاون مع الصناعة
